

## Types of Pokemon

### Type1

- Water
- Normal
- Grass
- Bug
- Psychic
- Fire
- Electric
- Rock
- Dark
- Fighting
- Dragon
- Ghost
- Ground
- Poison
- Ice
- Steel
- Fairy
- Flying

water had the highest count of type 1 at 150(12.56%), followed by Normal which had 131(10.97%) and Grass with 105(8.79%)...

Flying had the lowest count of type 1 at 10(0.84%).

From this Dataset Water and Normal Pokemon are more as compared to other types of Pokemon. while the flying pokemons are few.

apparently water and normal pokemon types are the easiest to see, while flying types of pokemons are rare and also weak.

Regieleki despite having only type 1 has the highest Speed amongst all the Pokemons at 200, followed by Deoxys Speed Forme with type 1 as well at 180.

a pokemon needs speed to dodge attacks from opponents in order to defend itself and also needs speed to attack faster.  
the fastest pokemon strikes first, the turn order is decided by the speed stats.

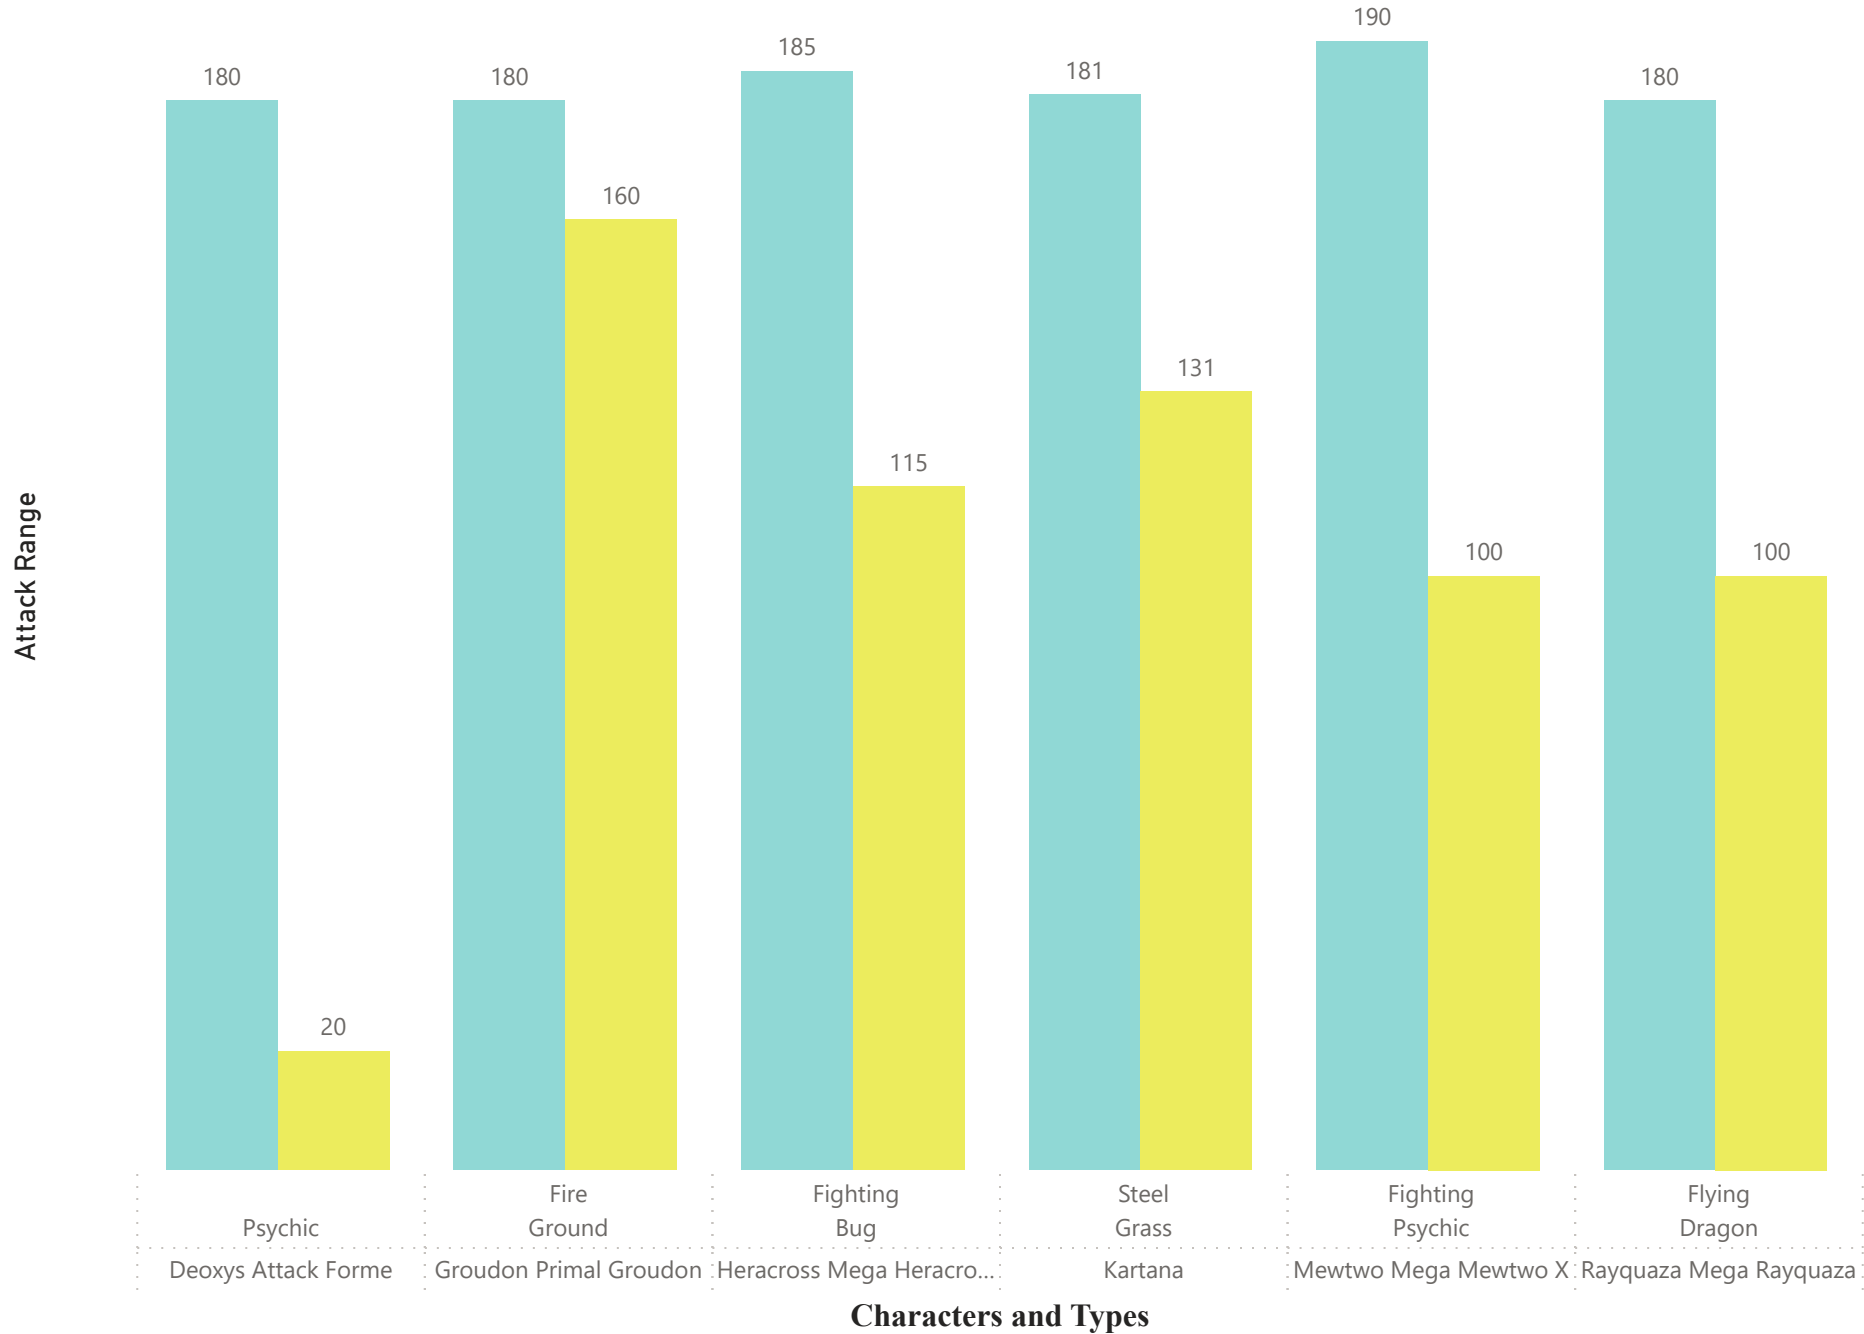

when looking for a pokemon with high speed, in this dataset, we know Regieleki is our guy.

● HitPoint ● Sum of Special Defense

Eternatus Eternamax has the highest sp.Def at 250, and also has the highest hitpoint at 255.. sp.Def makes a pokemon resistant to hits,while good hitpoints allows the pokemon to take a large extent of hit before it faints, even if it's a sp.Atk.

so eternatus having the highest Sp.def and hitpoint really gives him a huge advantage.

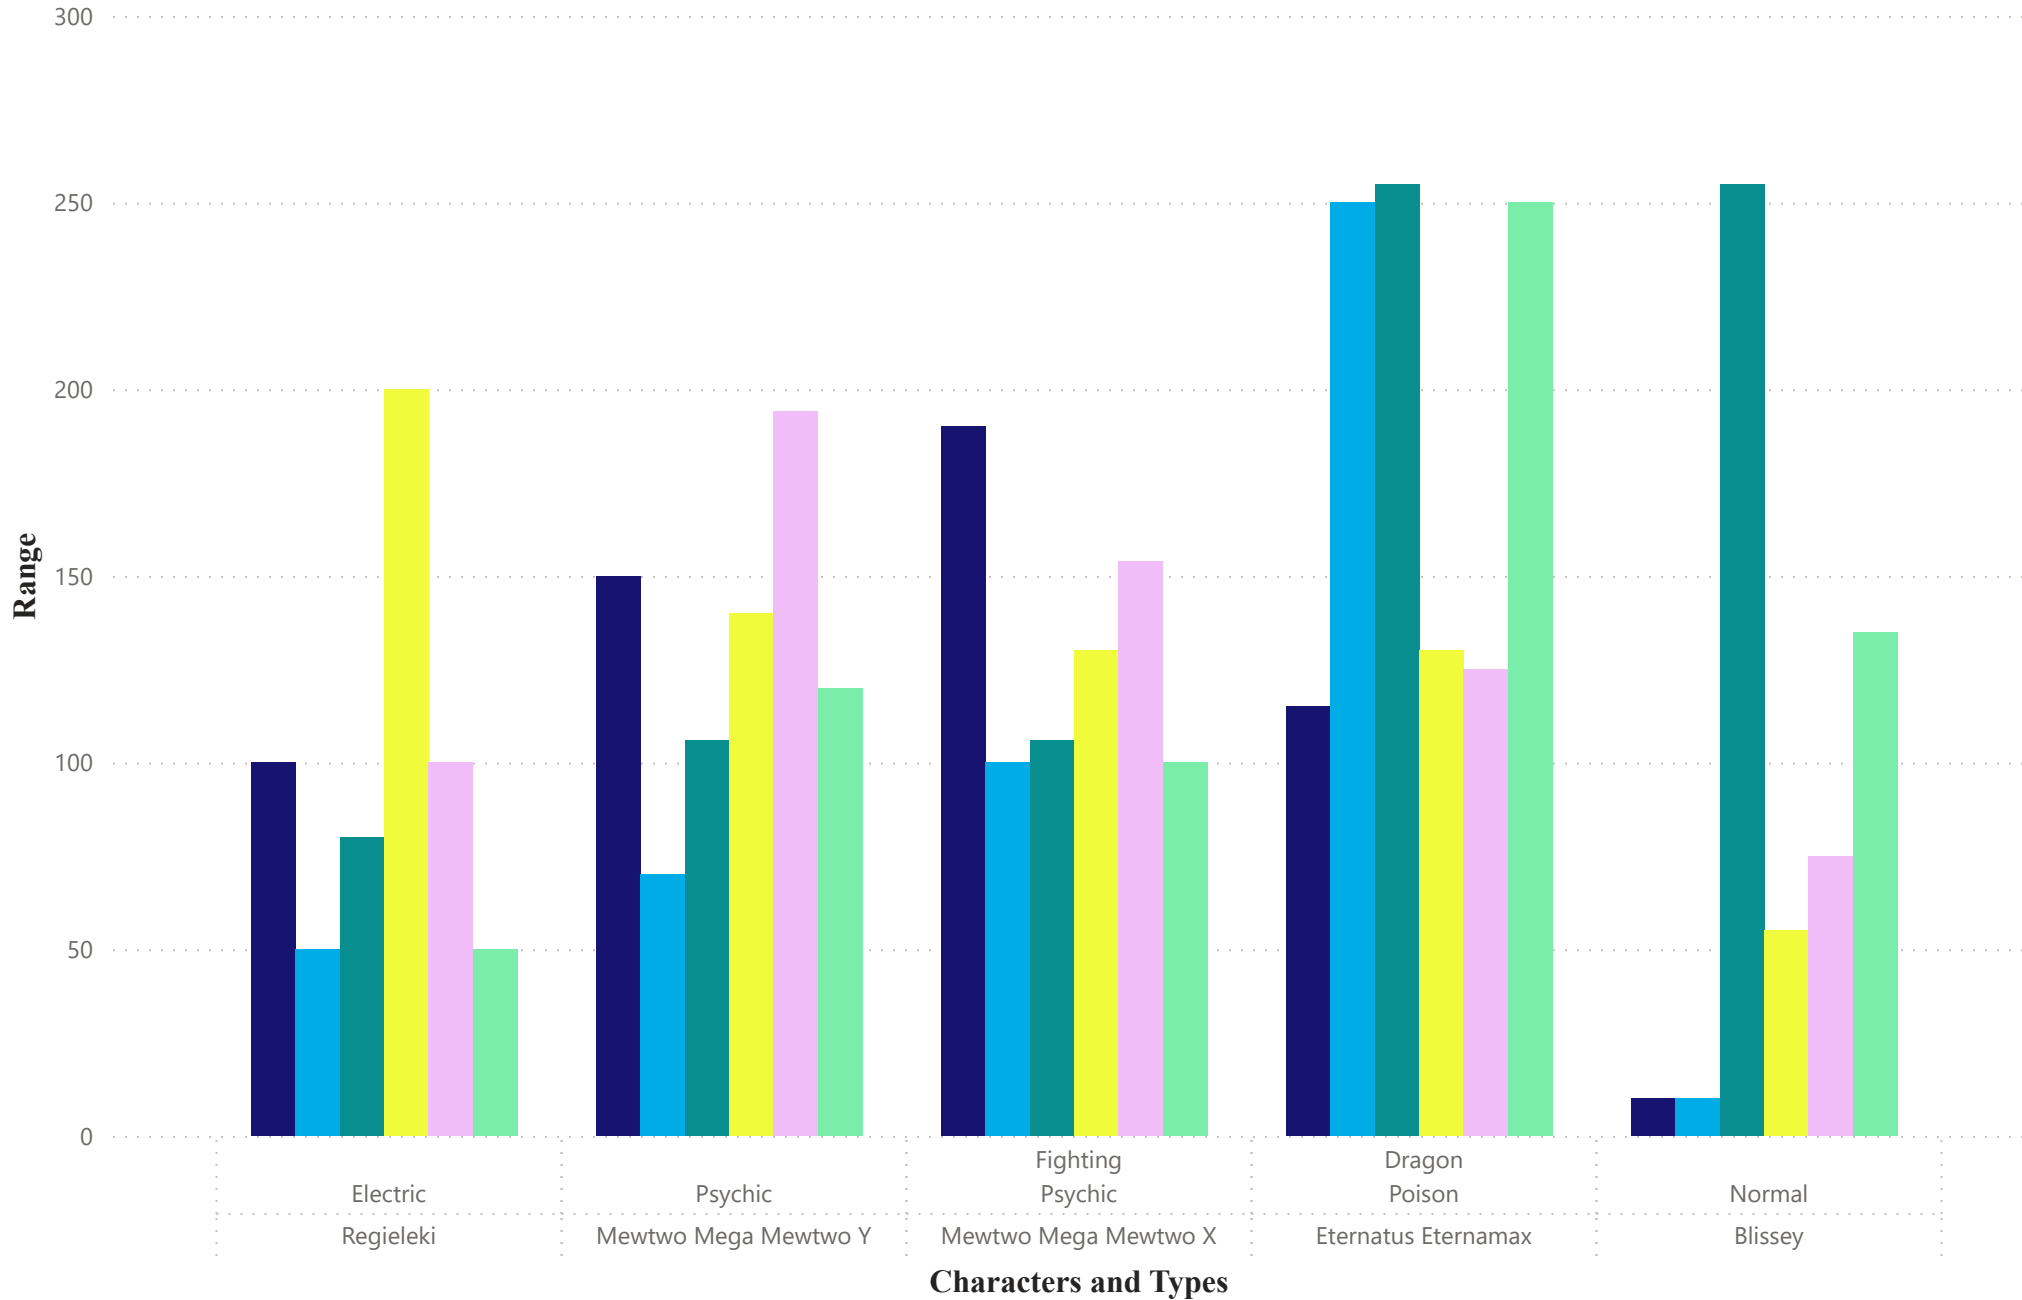

Mewtwo Mega Mewtwo X has the highest Attack at 190 and defense at 100 which is below the average, it means that he has a good attack advantage but can barely defend himself

then we have Groudon primal Groudon with Attack of 180 and defense of 160, which is way above average.....

a pokemon with good attack and defense is better than one with just a good attack

so we will consider Groudon primal Groudon first

Attack Defense HitPoint Speed Sp.Attack Sp.Defense

## INSIGHT

from this dataset, we have managed to bring out all the characters with maximum capability in each stat. when making battle strategies which involves picking the right guy for each stats.

### HITPOINT

Blissey and Eternatus Eternamax has the highest hitpoint of 255.

### DEFENSE

Eternatus Eternamax with two types,poison and dragon has the highest defense of 250.

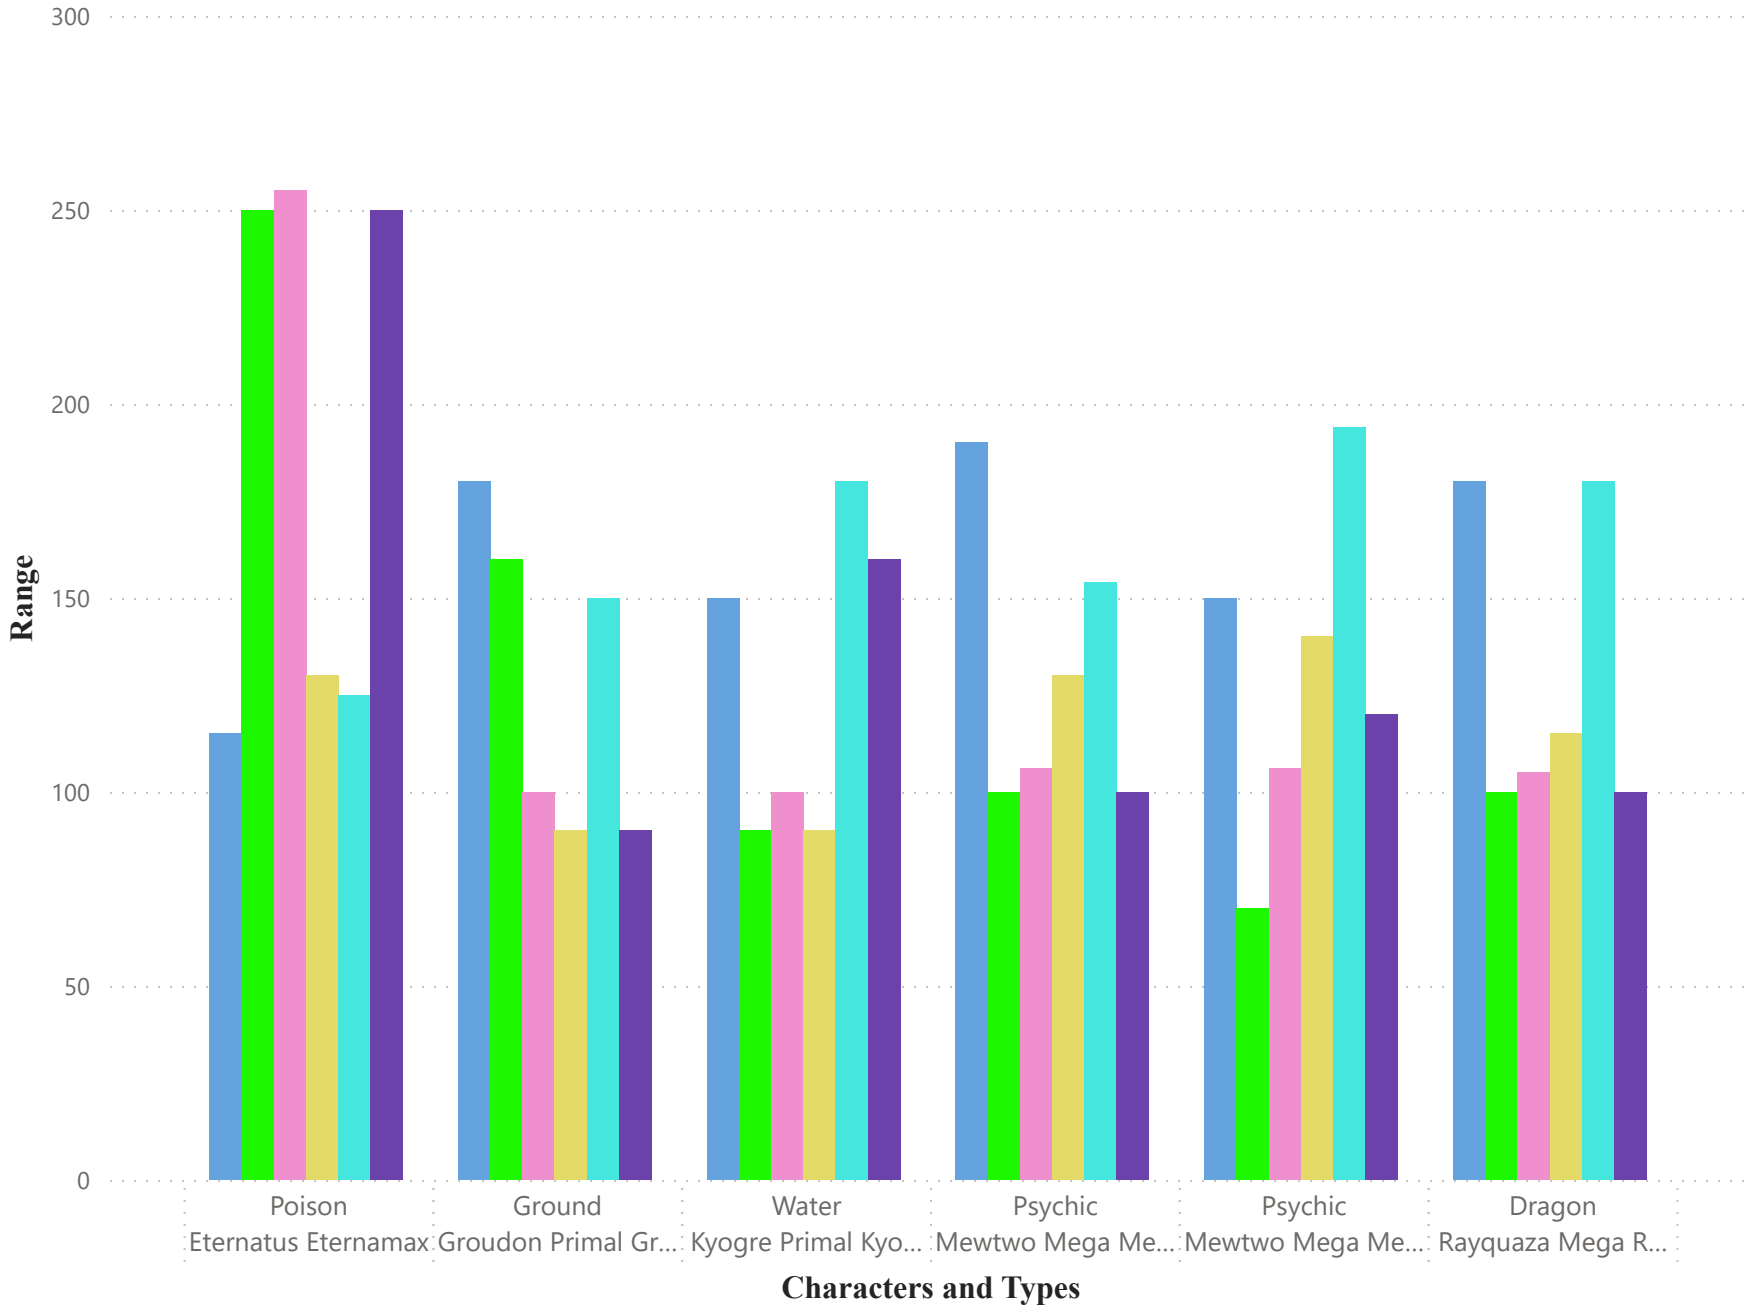

### ATTACK

Mewtwo Mega Mewtwo X has the highest attack of 190.

### SPEED

Regieleki has the highest speed of 200.

Sum of Attack Sum of Defense Sum of HitPoint Sum of Speed Sum of Special Attack Sum of Special Defense

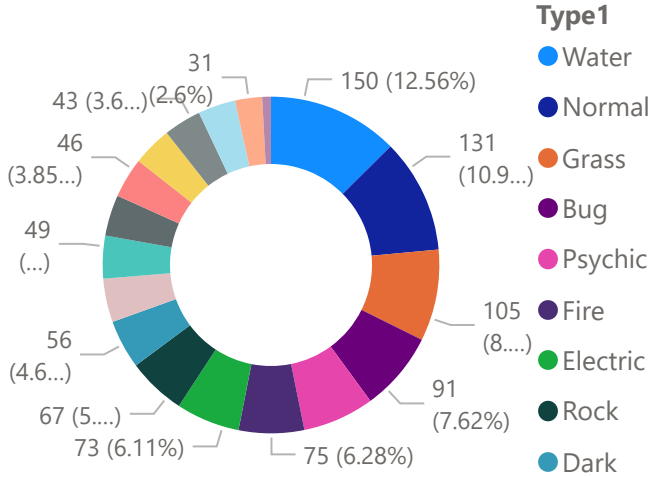

## CONCLUSION

Eternatus Eternamax has high stats in every angle but Attack, so the tendency of him causing damage to other pokemon is dependent on their level of defense.. if the opponent has a high defense level, then eternatus eternamax's tendency of causing damages to it is very low and vice versa.

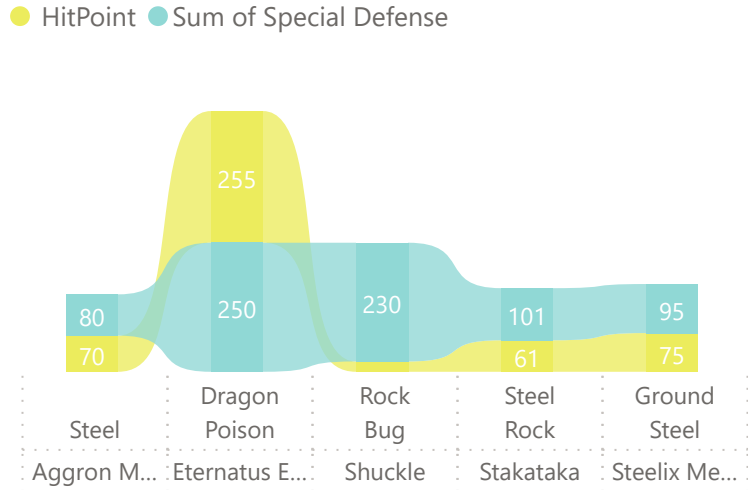

looking at the other 5 pokemon stats, we need to check for the pokemon that has the most balanced stat and not just being the highest with total and from our dataset, Mewtwo Mega Mewtwo Y, his entire stats are great except for his defense which he made up for with Sp.Def. followed by Groudon primal Groudon, Kyogre primal Kyogre, Mewtwo Mega Mewtwo X and lastly Rayquaza Mega Rayquaza. now with these stats, we were able to bring out top 6, pokemons with great stats for battle.
